

WHAT IS CLAIMED IS:

1. A foldable golf cart, comprising  
a main support member having two wheeled supports pivoted thereto;  
5 a handle rod pivoted to an upper end of the main support member at a  
lower end thereof; and  
two co-moving rods pivoted to the handle rod at upper ends, and pivoted  
to respective ones of the wheeled supports at lower ends;  
the handle rod having a fixing hook pivoted thereto by means of a  
10 pivotal element; the main support member having an engaging  
protrusion thereon; the fixing hook being capable of engaging the  
engaging protrusion to prevent the handle rod from moving relative to  
the main support member when the golf cart is in a stretched position.
2. The foldable golf cart as claimed in claim 1, wherein the main  
15 support member has a plurality of bored connecting ears, and the  
handle rod has a plurality of bored connecting ears, and a pivotal rod  
is passed through the connecting ears of the main support member  
and the handle rod.
3. The foldable golf cart as claimed in claim 1, wherein the handle rod  
20 has a through hole, and the fixing hook has a through hole; the pivotal  
element being passed through the through holes of the handle rod and  
the fixing hook; the pivotal element being screwed into a nut at a  
threaded tail end thereof.

4. The foldable golf cart as claimed in claim 1, wherein a torsion spring is passed around the pivotal element, and connected to both an engaging gap of the fixing hook and a locating protrusion of the handle rod at two ends respectively.
- 5 5. The foldable golf cart as claimed in claim 1, wherein the fixing hook has a cover fitted over it.
6. The foldable golf cart as claimed in claim 5, wherein the fixing hook has a plurality of connecting holes, and the cover has screw holes aligned with respective ones of the connecting holes, and threaded  
10 fixing elements are passed through the connecting holes, and screwed into the screw holes to secure the cover to the fixing hook.
7. The foldable golf cart as claimed in claim 5, wherein the cover has a stopping portion therein for stopping the fixing hook from moving inwardly of the cover.
- 15 8. The foldable golf cart as claimed in claim 1, wherein the handle rod has a locating protrusion, and the fixing hook has two concavely curved locating gaps on a top thereof capable of disengageably engaging the locating protrusion responsive to pivotal movement of the fixing hook on the pivotal element.
